Re: Water Sampling Request

Dear Ms Pearce:

Following our discussion on February 7 and receipt of Mr. Harten's letter dated February 2, which I received on February 8 regarding Chemours' request to test Little Hocking's raw and finished water for GenX at the next regularly scheduled sampling event on February 19 it has been determined that we need some additional information from Chemours on the proposed testing procedures in order to grant our approval.

We need a written copy of the following information as soon as possible:

- The name of the Laboratory that will conduct the analysis
- A copy of the protocol to be used for sampling
- A copy of the laboratory analytical protocol/method to be used

We also need to know whether the procedures have been specifically approved by the US EPA. Please provide a copy of the agency's approval communications

Following a review with our team, we will provide a response to your sampling request.

If you have any questions concerning this matter, please contact me.

Sincerely,
LITTLE HOCKING WATER ASSOCIATION, INC.

Jon T. Hanning
General Manager
